WORK EXPERIENCE

Consultant 3 Protiviti India Member

05/2022 - Present

Kolkata, India

Protiviti India is a global business consulting firm providing IT consulting, Risk & Compliance, Digital Transformation, Internal Audit services.

Achievements/Tasks

- Develop and deploy automation solutions using Automation Anywhere to streamline business processes and reduce manual effort.
- Analyze workflows, identify automation opportunities, and build reliable bots to improve efficiency and productivity.
- Monitor, maintain, and optimize automation processes while collaborating with stakeholders to support digital transformation.

PERSONAL PROJECTS

New Connection

- Developed an RPA solution using web, CSV, and email automation to streamline application processing. The bot extracts application details, validates them against historical and live data based on business rules, and automatically classifies outcomes such as duplicate, offer, or further appointment, improving accuracy and reducing manual effort.

Email Complaint

- Developed an end-to-end RPA solution integrating web, SQL, API, and email automation. The bot extracts request details from emails, validates consumer numbers using SQL, and leverages SQL and API integrations to categorize cases (e.g., payment, connection), enabling faster and more accurate processing with minimal manual intervention.

Vendor Reconciliation

- an RPA solution integrating SQL, email, SAP, and Excel automation to streamline vendor reconciliation. The bot extracts data from the database, retrieves files from SAP using T-codes, reconciles the data in Excel, and automatically shares vendor-specific reports via email, improving accuracy and reducing manual effort.
